رؤية VISION
2030
المملكة العربية السعودية
KINGDOM OF SAUDI ARABIA

INTRODUCTION

El Kafoury Group, was established in 1996 in the Kingdom of Saudi Arabia, specifically in the city of Al Khobar, in collaboration with Dar Al Dhahran Trading Establishment, focusing on manufacturing and hotel projects. The Projects Department was subsequently founded to execute WFR fabrics, curtains, furniture, and interior decoration tasks.

Under the trade name Very Special (the sister company of El kafoury Group), showrooms were inaugurated, including the Al Khobar Corniche Exhibition and the Prince Mohammed Street Showroom at Intersection .snoitacficeps remotsuc rep sniatruc dna ,erutinruf ,noitaroced emoh motsuc ot retac smoorwohs esehT .10 rojam dna ,stinu laitnediser ,sletoh htiw stcartnoc eruces ot demia sevitcejbo cigetarts s'ynapmoc ehT sa hcus snoitaroproc **Saudi Aramco, SABIC, and the Royal Commission.**

Notably, the company has successfully executed projects in four-star and five-star hotels, hospitals, and private villas for prominent executives of major corporations across the Eastern Province.

This success is achieved through partnerships with interior design and decoration offices as well. As part of its commitment to supporting the Kingdom's 2030 vision, the company expanded its operations by establishing a branch in Riyadh. This expansion underscores the company's dedication to continuous success, fostering communication, and pursuing development opportunities with leading companies and hotels.

Fabrics

At El Kafoury we specialize in fabric manufacture and pride ourselves on offering comprehensive services that span the entire process, from initial planning to final installation.

Our commitment to excellence and customer-centric approach make us the ideal partner for clients seeking top-notch fabric solutions.

- WFR
- Stain
- Chenille
- Plain & Textures
- Black-out
- Trevira CS
- 100% Polyester
- Velvet
- Jacquard & Print
- Sheers
- Linen

Curains

We manufacturer and provide curtains that are evaluated by an established set of guidelines and tested their ability to block light, regulate temperature, and hold up to use and machine washing (if applicable).

To test the curtains' light-blocking abilities, we turned off daytime interior lights and scored how well the curtains prevented outdoor light from leaking in. To test thermal control, we compared room temperature several times daily with the curtains open versus closed. We also scored the curtains based on fabric quality, thickness and drape, factors that influence how well the curtains wash and wear over time .

Curtains

El Kafoury company is a distributor for many international companies such as:

Kent Smoke and Fire Curtains is a British owned company with its base manufacturing set up in Dubai, focuses on details to manufacture bespoke designs for fire protection encouraging a safer space for work or living. It has been established to provide the finest active fire fighting solutions in this age of increasing demands for fire and smoke curtains.

Forest Drapery Hardware is an Australian, leading supplier of high quality and innovative drapery systems. Recessed tracking systems, corded tracks to Motorised decorative rods. It has drapery systems to suit the smallest bungalow to the largest hotels.

Serge Ferrari designs, manufactures and distributes innovative, flexible composite materials renowned for their light weight, durability and recyclability.

Depending on your outside view requirements, they can be perforated, waterproof or even opaque to offer protection against heat or bad weather, total opacity and privacy... In natural shades or bright colours, this range of products surely contains a fabric to suit your requirements for pergolas, façade or indoor blinds.

Linen & Bedding

We are a professional manufacturer and customize the hotel bedding & towels with many years of production experience, advanced technology, exquisite processing equipment, and strict quality assurance.

- Duvet Cover
- Bed Sheets
- Mattress Protector
- Linen
- Pillow Series (100% Cotton - Downproof - Pollycotton)
- Fabrics for choice (100% cotton - Pollycotton)
- T1000T ... ,450T ,400T ,350T ,300T ,250T ,200

This certificate attests that all provisions concerning the assessment and verification of constancy of performance described in Annex ZA of the standard **EN 13986:2004+A1:2015** under system 1 for the performance set out in this certificate are applied and that the factory production control conducted by the manufacturer is assessed to ensure the

constancy of performance of the construction product.

This certificate was first issued on 05 February 2021 and will remain valid as long as neither the harmonised standard EN 13986:2004+A1:2015, the construction product, the AVCP methods nor the manufacturing conditions in the plant are modified significantly, unless suspended or withdrawn by the notified product certification body.

The validation of this certificate will be confirmed by a half-yearly surveillance.

Kent

Smoke and Fire Curtains

CUTSHEET

DESCRIPTION

Kent Automatic Smoke Curtains assist the management of smoke in a building, channelling the movement of smoke to smoke extraction points in the building or creating reservoirs to slow down the spreading of smoke.

The curtains remain virtually invisible in their retracted position within the compact head-box.

When signalled by a local detector or fire alarm system, the curtain descends to the operational level using the gravity fall safe system.

Pink - DFC

SYSTEM TESTED IN ACCORDANCE WITH

- BS EN 12101-1 Annex B (Reliability, Response time & Material Durability)
- BS EN 12101-1 Annex C (Air Leakage)
- BS EN 12101-1 Annex D (Fire Resistance Test)
- UL 10D, UL 1784

- The system is CE Marked in accordance with EU Construction Products Directive (89/106/EEC) as amended by the CE Marketing Directive (93/68/EEC)

GENERAL DESCRIPTION

The fabric curtain is manufactured from VG455 woven glass fibre cloth and has a nominal weight of 455g/m² and is tested to withstand temperatures of up to 600°C for a period of 120 minutes. The active roller assembly, incorporating the fabric, is housed in galvanized mild-steel head box which is normally secured to the fabric of the building. The curtain head box is manufactured from 1.2 mm galvanized steel, the enclosure is rated at the same temperature as the curtain material. Removable cover plates are incorporated to allow access to the curtain rollers. Standard head box sizes are 150 mm x 150 mm for single. Larger head boxes may be required where the curtain drop is in excess of three metres. A galvanized mid steel profile is supplied as standard; this locates into the profile formed in the bottom of the box. The roller is constructed from an octagonal tube, each of which incorporates a 24volt d.c. motor & gearbox and a sealed heavy duty ball bearing assembly. A motor control circuit housed in a steel enclosure is mounted onto the motor end of the head box.

CONTROL SYSTEM

Operation of the curtains is via the KGC (Kent Group Controller) which can either be mounted adjacent to the smoke curtain head box within the ceiling void, allowing access for maintenance or mounted in a remote position from the curtain.
The controller requires a local 230v ac supply rated at 3 amps via an unswitched supply maintained supply installed by others. For operational purposes the KGC must be connected to a

MORE FROM WOOD. **EGGER**

Revision: 05
Approved: 14.02.2023

Technical data sheet

EGGER Laminates

Description

EGGER Laminates are decorative laminates based on curable resins. They have a multi-layered structure and consist of impregnated decorative paper as well as one or more impregnated core layers.

Description: EGGER Laminates
Type of material: HGP (Horizontal General-Purpose Postforming) according to EN 438-3
Certification: MED (Marine Equipment Directive) for nominal thicknesses 0.80 and 0.80 mm

Availability

EGGER Laminates are part of the EGGER Decorative Collection in the nominal thickness of 0.80 mm. They are available in selected decors from stock and in quantities of one, according to the country-specific delivery lists. Further decors are produced with a minimum order quantity of 200 m² per version and always made to order – see section "Delivery form".

Technical data

In accordance with the EN 438-3, EGGER Laminates are classified as a HGP (Horizontal General-purpose Postforming). This means that the laminate can be used for horizontal applications with postforming requirements. Laminates with pearlescent decor are classified as ATP (see technical leaflet "EGGER Laminates with pearlescent decor").

Property	Test standard	Unit or feature	Value
Resistance to surface wear*	EN 438-2	Revolutions (min.) Initial point	≥ 150
Resistance to impact by small diameter ball*	EN 438-2	N (min.)	≥ 25
		1.00 mm ≤ 1.1.20 mm	≥ 20
		0.80 mm	≥ 16
		0.60 mm	≥ 16
Resistance to scratching*	EN 438-2	Riding (mm)	2
		Smooth finishes Textured finishes	2 3

SECTION 12600 FURNITURE

PART - 1 GENERAL

1.01 DESCRIPTION

A. Furnish all labour, materials, tools, equipment, and services for all furniture and furnishings as indicated, in accordance with provisions of Contract Documents.

B. Completely coordinate with work of all other trades.

C. Although such work is not specifically shown or specified, furnish and install all supplementary or miscellaneous items, appurtenances and devices incidental to or necessary for a sound, secure and complete installation.

D. Division 1, General Requirements, is a part of this section and shall apply as if repeated here.

E. Work performed under other sections and which is related to this section is specified in:
Section 09900 Painting
Section 10100 Markerboards
Section 10440 Signs
Section 11400 Food Service Equipment

F. Read in conjunction with furniture layout drawing.

1.02 QUALITY ASSURANCE

A. Furniture and Furnishings may be inspected by the Client at manufacturer's plant prior to shipment, and will be inspected by the Client after placement by Contractor on Project Premises, in spaces as indicated on Furniture Layouts and Schedules. Furniture and furnishings found to be not in accordance with specifications and approved submittals may be rejected. The Contractor shall replace rejected furniture and furnishings at no cost to the Client.

B. Electrically operated furniture and furnishings, and portions thereof:

- Comply with latest standards of the National Electrical Manufacturer's Association (NEMA) and National Electrical Code (NEC).
 - Each electrical item, specified as a part of a furniture and/or furnishings item, shall be capable of functioning with an operating voltage of 127 volts.
 - All electrical items, specified as parts of furniture and/or furnishings item, and soft-wired with cords and plugs, shall have plugs which are compatible with the receptacles specified for the project in Specifications Division 16.

1.03 CODES AND STANDARDS

A. Unless otherwise stated elsewhere in these specifications, the work shall be performed in compliance with the following internationally accepted standards as applicable:

- ASTM A36 Standard Specifications for Structural Steel
- ASTM A446 Specification for Steel

Ministry of Defense, Royal Saudi Air Forces **12600-1**

D. Furniture/furnishings manufacturer of each item shall provide to the Project Site the correct number of each item, along with all miscellaneous parts and printed instructions and/or drawings to allow for a complete installation of all such items.

E. Contractor shall follow manufacturer's printed instructions and/or drawings for any additional assembly required on-site for furniture and furnishings, and shall perform the work with persons skilled in such tasks of final assembly/installation.

F. Damages/Correctness:

- Repair all damage done to Project premises as a result of final assembly/installation.
- Replace or repair to new condition, all furniture or furnishing items damaged as a result of final assembly/installation.
- Project premises and installed furniture and furnishings shall be subject to review and approval/disapproval by the Client for damages, repairs and correctness as applicable.

G. Test and adjust all furniture and furnishing items for satisfactory operation.

H. Installation shall be complete in every respect.

3.04 CONNECTIONS TO BUILDING

A. Connections to floors, ceilings, walls and other parts of the building, and also connections between individual items, must be closely fitted and carefully carried out.

B. The fixing of all fitted components to the structure, and jointing and corner connections, must be carried out in a secure and workmanlike manner. This applies both for fixed and removable fittings.

3.05 COMPLETION OF WORK

A. The Contractor shall take full responsibility for the correct furnishings, fitting and layout of the furniture as described in the specification, including the application of the initial treatment (eg oiling, etc.) and for final cleaning. All packaging labels, tags, markings or other transit markings shall be removed from all furniture and fittings.

B. The Contractor shall bear sole responsibility for taking the necessary precautions, with due consideration of the conditions prevailing on the building site, to ensure that the work handed over is free from damage and in perfect condition.

3.06 FURNITURE CATALOGUE CUTS:

(Refer to furniture, fittings & equipment catalogue cuts documents).
